RE: DRAFT FSIP REPORT
MARBLE CLIFF QUARRIES DUMP
OHIO ID#: 125-0494
FRANKLIN COUNTY

Ms. Jeanne Griffin
United States EPA
Region 5
77 West Jackson Blvd. (HSM-5J)
Chicago, Illinois 60604

Dear Ms. Griffin:

A review of the September 13, 1994 draft Focused Site Inspection Prioritization for the Marble Cliff Quarries Dump (US EPA ID# OHD980510226) has been completed by the Ohio EPA. There are no specific comments regarding the FSIP itself. However, it was unclear why only cadmium was used to determine the toxicity/mobility and toxicity/persistence/bioaccumulation factor values. It seems that chromium, which was also found in the 1990 SSI sample results, could have been used in conjunction with the cadmium values. Please have PRC contact me with an answer or the reasoning for chromium not being used to determine the toxicity/mobility and toxicity/persistence/bioaccumulation factor values.

Should you have any questions, please feel free to call me at (614) 771-7505.

Sincerely,

Samir E. Yebaile
Site Coordinator
Division of Emergency and Remedial Response
Central District Office

Subject: Marble Cliff Quarries Dump, Columbus, Ohio
EPA ID No. OHD 980 510 226
Focused Site Inspection Prioritization (FSIP)
Contract No. 68-W8-0084, Work Assignment No. 35-5JZZ

Dear Ms. Griffin:

PRC Environmental Management, Inc. (PRC), has prepared the FSIP site evaluation report (SER) for the above-referenced site (Enclosure 1). PRC reviewed available information, conducted a site reconnaissance, and prepared a preliminary Hazard Ranking System (HRS) score for the Marble Cliff Quarries Dump (MCQD) site. Based on PRC's findings, the preliminary HRS score for the site is less than 28.50. Therefore, PRC recommends that the site receive a no further action (NFA) designation.

Photographs taken during the site reconnaissance are included in the appendix of the SER. The U.S. Environmental Protection Agency recommendation form is included in Enclosure 2. The MCQD site preliminary HRS score is documented in a transmittal memorandum and preliminary scoresheets in Enclosure 3.

If you have any questions, please call me at (703) 556-2585 or Christopher Scott at (312) 856-8746.

Sincerely,

A handwritten signature in cursive script that reads "Christopher Scott for".

**Subject: Marble Cliff Quarry Dump Site
EPA Identification No. OHD 004 280 897**

Dear Mr. Tollichet:

PRC Environmental Management, Inc. (PRC), has been retained by the U.S. Environmental Protection Agency (EPA) Region 5 under Contract No. 68-W8-0084 to evaluate and assess candidate sites for the National Priorities List under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and the Superfund Amendments and Reauthorization Act (SARA). PRC is conducting these evaluations under the supervision of Ms. Jeanne Griffin, EPA Region 5 Work Assignment Manager.

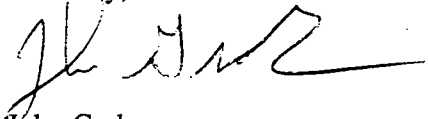

Information supplied to EPA through CERCLA notifications (as required by Section 103(c) of CERCLA) has identified the Marble Cliff Quarry Dump (MCQD) site as a possible candidate for a sampling investigation. To aid in the evaluation, EPA has requested that PRC perform an on-site assessment which has been scheduled for 11:00 a.m. on Wednesday, July 27, 1994. A follow-up visit may be scheduled in the near future to conduct sampling activities. Photographs will be taken during both visits to document site conditions and activities.

PRC has completed a preliminary records search for available information. However, we request that you or a representative be available to answer any additional questions during the on-site assessment to assure that all information is complete and accurate. Access to any relevant maps, diagrams, hydrogeologic reports, environmental assessment reports, sampling data sheets including methane soil gas data, environmental permits, manifests, and correspondence is also necessary to complete the assessment.

John Grabs and Jack Brunner of PRC will participate in the site visit. Representatives of the Ohio Environmental Protection Agency (OEPA) and EPA will also be invited to participate in this visit.

If you require additional information, please call me at (312) 856-8728 or Ms. Jeanne Griffin at (312) 886-3007.

Sincerely,

John Grabs
Geologist
